About Cityschool

We created the first NFT educational courses

Cityschool.online is a blockchain-based educational ecosystem that provides a full suite of functionality for online learning, course sales, and various educational services.

Key benefits

Why Cityschool has a claim to success

NFT online courses

Cityschool.online is developing technology that will allow authors to create NFT online courses. This will turn the online course into a real digital commodity and give you the

Works with blockchain

All services of then Cityschool.online are integrated with the social network and complement each other. Everything works as a single educational ecosystem

Tokenization of user activity

The Cityschool.online network rewards any likes, posts, blog posts, referral leads and other activity. Every active user of the educational social network receives CFD tokens to their

opportunity to protect your intellectual property, share ownership of copyright, buy for yourself, donate or resell to another Holder and get income.

that interacts tightly with blockchain.

crypto wallet, which can be exchanged for valuable assets.

Services

Cityschool Online

Hybrid Social Marketplace Architecture

The online course marketplace integrated with a social network gives course owners great opportunities for new purchases and students. Hybrid Social Marketplace Architecture.

Study groups

Study groups allow professional educators, training organizations, or teams to create an online school and sell educational services by subscription.

Blog & Forum

Start your own blog or participate in discussions on various education forum

Finding and hiring a full-time tutor

The site for the sale of full-time tutoring services gives you the opportunity to find a full-time tutor for yourself or your children by proximity. It also allows professional tutors to find students.

Video Stream & Chat & Zoom

Use all kinds of modern communications for your online training. Close interaction between student and tutor through a variety of services: webinars, video streaming, video chat, audio chat, text chat and more.

Events

Let the social community know about your new learning event, gather attendees through online invitations.

topics to promote yourself, your courses or online learning services.

Study groups

Study groups allow professional educators, training organizations, or teams to create an online school and sell educational services by subscription.

Referral program

The internal referral program allows everyone to earn money from popular online courses and attract new customers to promote new training products.

Crowdfunding for educational projects

The internal crowdfunding service for raising funds for various educational projects.

Advertising system

An internal advertising system is a powerful tool for promoting educational services or online courses and getting an influx of new students or followers.

CFD Tokenomics

We exist in a double loop tokenized system

Governance token

CFDD

CFDD - governance token for equity distribution between [DAO CFD Team](#) partners.

Budgeting

Distribution of collected funds

The funds raised will be used to cover the team's expenses for the next 9 months.

Business Model

Sources of income Cityschool

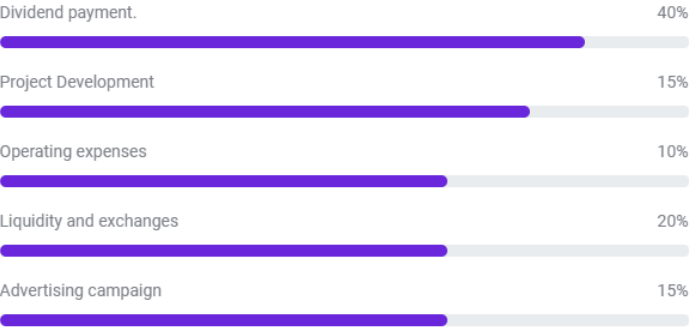

- Commission on sales of online courses.
- Commission from the release of NFT courses.
- Transaction fees on the NFT course trading platform.
- Commission on sales of study group subscriptions.
- Profit from the sale of Pro accounts.
- Profits from the sale of advertising services to promote online courses and study groups, events and lendings.
- Receipts from the rental of external advertising systems.
- Farming CFD tokens.

Additional income

Income from other projects, services and services that the CFD Team sells.

Income distribution

Income from all projects, services and services that the **CFD Team** sells will be used to cover operating expenses and pay dividends.

Profit distribution

The distribution of profits is made in proportion to the share ownership of **CFDD Tokens** from the total volume of issuance.

Dividends are paid on the 15th of each month on the basis of a monthly report, which is published for all **CFDD Token** holders no later than the fifth day of each month.
